Pre-Bid Queries

Sr.No	EOI Document Clause/ Section No.	Type of Query	Content of the EOI Requiring Clarification	Clarification Sought	Response /Revised Clause
1	Section no. 5.2 CCTV Camera, Pole and Other Technical Specification / Page no. 42	Technical Specification	POE Injector Switch 8 Port Gigabit PoE Switch with 1 Giga (RJ-45) UP-Link Port and 1G Fiber UP-Link Port PoE Port Output Power – 15.4/30W IEEE802.3af/at PoE Power Budget 55W minimum Transmission distance – 150 m Working temp: -10 – 55 Degree C	We kindly request that you revise this clause. Currently, each pole is spaced 30 meters apart, and as per the mentioned clause, we are required to install an 8-port switch in the middle of each pair of poles. This setup necessitates wiring on both sides, resulting in the following distances from the switch to each machine: the first machine is 30 meters away, the second machine is 60 meters away, the third machine is 90 meters away, and the fourth machine is 120 meters away. The same distances apply to machines on the other side. We suggest allowing the installation of 4-port switches instead, as this would be more cost-effective and simplify the installation process.	Please refer to the corrigendum.
2	General Criteria	General	Server Room	We kindly request that you please add the cost of the server room to the Bill of Quantities (BOQ).	No Change in Clause.
